# Objective of Pilot

The global industries must be able to lower their emissions and prove it all the way to the end customers. Rapidly electrifying work machines are helping global economy in mining, logistics, agriculture, forestry, and construction to meet the zero-carbon goals and lower emissions. The problem is that data can't be shared between various stakeholders in machines' lifecycle.

Sitra's funding enables to pilot the world's first battery passport for Movable Work Machines, showcasing **how complete lifecycle data can be linked to industrial batteries, machines, and users with the help of DPPs.**

**The project provides a comprehensive example of how industrial data spaces and DPP can be utilized to deliver the EU Battery Directive and Data Act in practice.**

The SIX Movable Work Machines consortium, comprises of leading Nordic manufacturing companies such as Sandvik, Kalmar, Valtra, Ponsse, Junttan, Valmet Automotive, and Nokia.

Lithium-titanate Battery  
MPP48V-296cde7f

BASIC INFORMATION

Verification state: Trusted

Product Code: MPP48V

Dataspace domain:  
[valmet-automotive.com](https://valmet-automotive.com)

Available Dataproduct name Close ^

Manufacturer: Valmet Automotive

Product Code: MPP48V

Cell Type: lithium-titanate

Capacity: 2.2 kWh

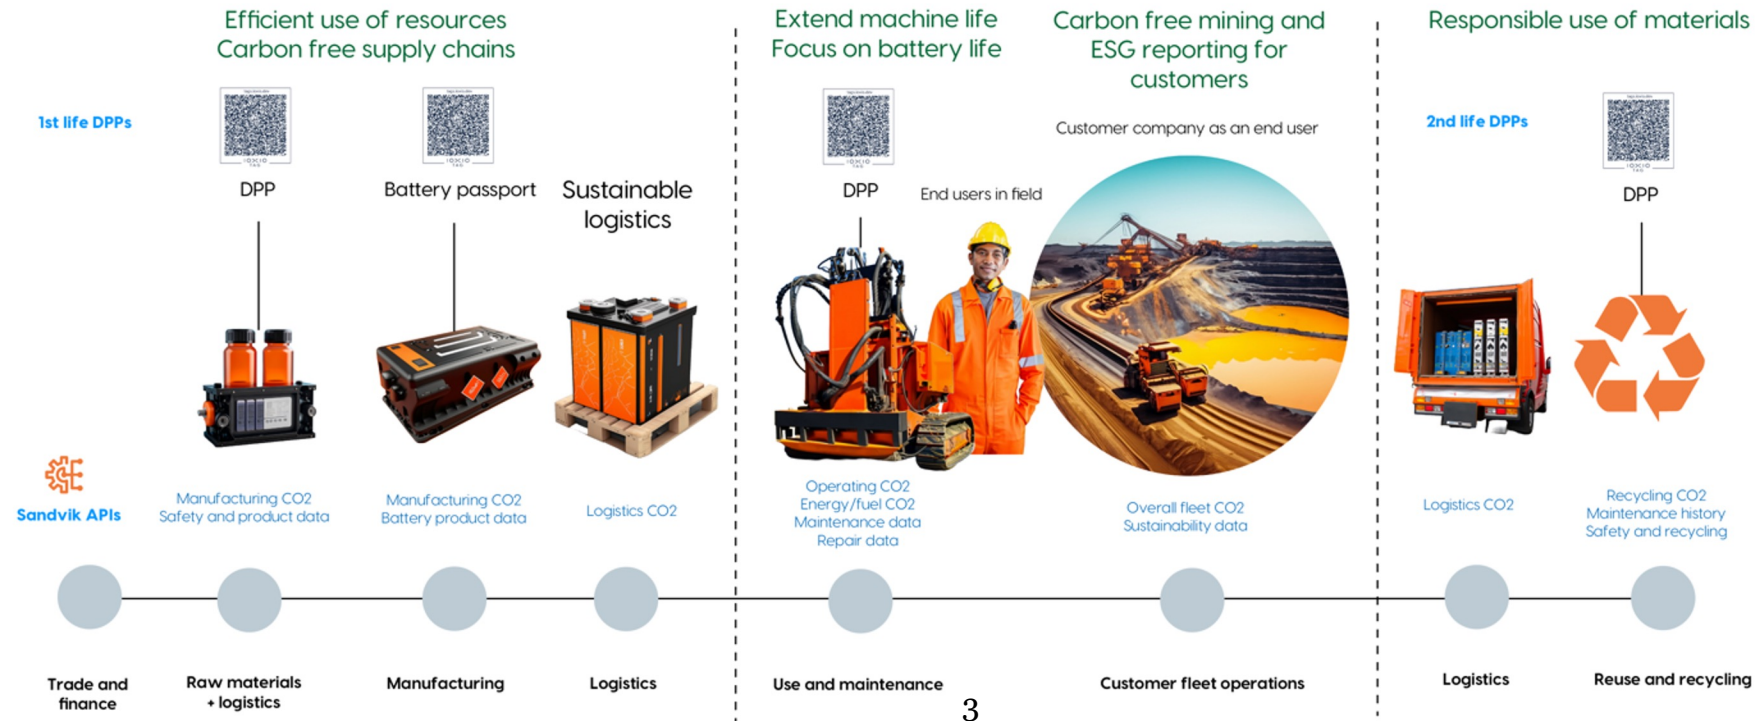

Energy: 46 Ah

Voltage: Min 38 V  
Max 56 V  
Nominal 48.3 V

# We are testing how the DPPs can deliver the ESG data along the battery's lifecycle

How global end users in mines and ports can connect with machine's and battery's manufacturing ESG data just by reading the QR-code on the side of the machine

How the battery health data read directly from the battery QR-code can be used in sustainable finance of new batteries and to promote responsible 2nd life and recycling

# Pilot Companies: Sandvik and Kalmar

The **Sandvik Group** is an international high-tech industrial conglomerate whose solutions enhance customers' operational productivity, profitability, and sustainability in the manufacturing, mining, and infrastructure industries.

*Sandvik is piloting with the most advanced underground drill rig made in Tampere that makes it possible to reduce emissions in mines*

**Kalmar** provides load handling solutions and services for ports, terminals, distribution centers, and heavy industrial use. Automation of terminals and energy-efficient container handling are pioneered by the company. Every fourth container globally is moved through the use of a Kalmar solution. Each of your transports is optimized through our extensive product range and global service network, and our ability to seamlessly integrate different terminal processes.

*Kalmar is piloting with electrified straddle carrier used to make global ports more ecological*

# WHAT DATA EU WANTS IN BATTERY PASSPORT AND DATA ACT?

Lifecycle stage data  
(Battery Directive - manuf-raw mat / use / end of life)

Carbon footprint data  
(Battery Directive)

Battery passport data  
(Battery Directive)

Public data  
(Battery Directive)

Restricted data  
(Battery Directive)

Static data  
(Battery Passport)

Dynamic data  
(Battery Passport / DataAct)

Mandatory data  
(Battery Directive)

Voluntary data  
(Battery Directive)

Critical raw material data  
(Critical Raw Minerals Act)

Data carrier i.e. QR-code  
Vendor domain  
Generic product identifier  
Unique identifier

DPP metadata  
Public keys for signatures  
Supported data products  
Which dataspace to use

Industrial data space  
Productized data

## UC1 DL422iE Jumbo is delivered to a new customer with FZSoNick battery and battery passport (DPP/ESPR/EU Battery Directive)

## UC2 Battery health data is accessed with DPP in 1st life use (DPP/ESPR/EU Battery Directive + EU DataAct)

## EUC1 External use case with [redacted] Customer can access also the battery financial data (e.g. risk/value)

Kalmar and Sandvik are the first in the world to demonstrate the use of DPP in real test machine environments in February

**KALMAR**

**ESC 450**  
SERVICE ACCESS

10x10

This is a white rectangular label with a black border. At the top left is the Kalmar logo, which consists of a stylized 'K' inside a square followed by the word 'KALMAR' in bold, uppercase letters. Below the logo is a black silhouette icon of a forklift. Underneath the icon, the text 'ESC 450' is written in a large, bold, sans-serif font, with 'SERVICE ACCESS' in a smaller font below it. At the bottom of the label is a large QR code. Below the QR code, the text '10x10' is printed in a simple sans-serif font.

**KALMAR**

**BATTERY**  
BATTERY PASSPORT

10x10

This is a white rectangular label with a black border. At the top left is the Kalmar logo, which consists of a stylized 'K' inside a square followed by the word 'KALMAR' in bold, uppercase letters. Below the logo is a black silhouette icon of a battery with a lightning bolt symbol and minus/plus signs. Underneath the icon, the text 'BATTERY' is written in a large, bold, sans-serif font, with 'BATTERY PASSPORT' in a smaller font below it. At the bottom of the label is a large QR code. Below the QR code, the text '10x10' is printed in a simple sans-serif font.
